## 8 \*arch 1956

\*ENCORANGES FOR THE ERCORD

1. On 2 Farch I discussed with	Lockbeed Project
ersonnel Officer, the question of	who would be
stedims the senior engineer for Lockheed with	
at the Lockheed medical people are not ready t	to fully qualify
or overseas duty based upon the present existen	nce of a condition
reported as right inguinal hernia.	
2. proposed informally that in	ries of the location of
ase A, the Project might be willing to permit	
ith the Detachment despite the lack of medical	qualification by the
capany. Paraonally I took a dis view of this	suggestion, but to make sure.
	Medical Staff, and put
he question to him said that he we	es against the idea and
ited several instances recently where CIA perso	
necountered difficulty with ruptures stamming fo	
he condition is not related to the amount and h	
he individual undertakes but may develop without	
added that while an elective hermioton coergency hermia flareup may require appears	
o prevent strangulation of the lower bowel which	
n short order to demise.	we waste on Evidence gran
3. I conveyed opinion to	and told him that
hile I recognised the important job	lid, that we were against
tile I recognised the important job ending him without corrective surgery, nor did	iid, that we were against we favor the idea of sending
tile I recognised the important job ending him without corrective surgery, nor did in with the promise that this surgery would be	iid, that we were against we favor the idea of sending accomplished overseas.
hile I recognised the important job ending him without corrective surgery, nor did in with the promise that this surgery would be f course, in the latter instance, the Project w	iid, that we were against we favor the idea of sending accomplished overseas.
ails I recognised the important job ending him without corrective surgery, nor did in with the promise that this surgery would be course, in the latter instance, the Project w	iid, that we were against we favor the idea of sending accomplished overseas.
